RAIN...GLORIOUS RAIN

This past week we experienced more rain than Bloemfontein has seen in a long time. The dams are filling and water scarcity is hopefully under control for a while. An interesting comment was made by a resident questioning how we experienced water rationing a few weeks back with the official reason being given as turbidity. With the amount of rain that has just fallen, turbidity was not an issue and there have been no restrictions. Are we having the wool pulled over our eyes? It seems as though the prepaid water meters do not like getting wet as there has been a large number of meters giving issues and resulting in no water for premises. Remember when you have a municipal issue to please contact the Mangaung Municipality directly on 0800111300 / 051 - 4058885 or WhatsApp 065 586 6261. Obtain a reference number and post it with a description to the [WNA General Info Group](#) for assistance.

We have been systematically trying to repair the catchment drains across Westdene but when they block or are damaged by vehicles parking on the pavement (left), restricting the flow of water, the result is flooding in the area (right)

Relating to security issues, please make use of the [WNA Crime Group](#) 🚗 on WhatsApp. Our security partners ProForce, Bloemsec, Fidelity ADT & Senforce monitor this group directly from their Control Rooms and this is the quickest way to obtain assistance. Let's all be the eyes of the suburb and report anything suspicious. We are trying to resuscitate the Community Police Forum for Sector 2 (Westdene, Brandwag & Willows) and would welcome anybody willing to assist with patrols in conjunction with SAPS, Metro Police and our security partners. Contact me if you would like to get involved in keeping Westdene safer.
